Place Making: Developing Town Centers, Main Streets, And Urban Villages

Synopsis

This ULI best-seller is the definitive guide to place making for town centers and walkable mixed-use development. The planning, design and development of town centers and urban villages with mixed uses in pedestrian-friendly settings is an essential, timeless foundation of communities that are livable, sustainable, enduring places. This book will help navigate through the unique design and development issues and reveal how to make all elements work together in contemporary development and revitalization of main streets, town centers and urban villages.

Customer Reviews

I was put on to this book by a professor at USF School of Architecture. It contains not only the history of placemaking but real examples of placemaking and tools in how to achieve the notion of "place." Not only is this a great resource, but it is easy to read and follow along. Highly recommended!

In my opinion, this is a fine book which details basic current planning principles. There are many photos and many references to built projects. Case studies are a strong point of this fine book.

I found this book to be one of the best out on the topic, of which there are too few at present for such an important topic. The depth and breadth of place-making topics and their coverage makes this a very excellent easy-to-read-and-understand as well as a long-term reference tool. The graphics are very well done. Having recently attended a Harvard program on retail for cities and

new towns and urban center given by Bob Gibbs and Terry Shook, I especially found the book right on target. I want to see more of these types of books.

An excellent source of well researched information. Bohl has used excellent case studies used to illustrate the issues. Certainly a valuable read.
