Athenian Red Figure Vases: The Classical Period (World Of Art)

Synopsis

Like his other two works on Athenian Figure Vases, John Boardman offers a detailed survey of the important painters and workshops of the time, providing readers with over five hundred illustrations and a complete bibliography. Particular attention is paid to the technique and to the production and marketing of these outstanding vases as well as to the information they provide about everyday life and the way this reflects the changing fortunes of Athens through the period. We see how the increasingly diverse subject matter throws much light on Greek myths and religious practice, and how the appearance of flamboyant vases in the final phases of the Classical period seems to show Athenian painters looking back to earlier achievements in their craft. 566 illus.

Customer Reviews

This is another John Boardman book covering Greek Art. This style starts during the late 6th century BC, flourishing in the 5th century BC. It was started by the Athenians, and some of the most famous Greek artists are Red Figure Vase painters. John Boardman is a master storyteller, and he is able to tell the story of the Red Figure painters without sounding too distant. His knowledge of such matters shows and he talks as if he really understands the motives of the artists. His dissemination of different artists and their schools will certainly help the layperson or the student of history. This is a Must Buy!
